

Table of Contents

<i>Preface</i>	5
----------------------	---

Part I. Wireless communication in computer systems solutions

1. UAV application for delivering the Internet access during the geodetic measurements.....	9
Klamka J., Janusz W., Maćkowski M., Niezabitowski M., Orwat J., Sikora P.	
2. Variability of LTE signal in Indoor Environment	27
Gorawski M., Grochla K., Polys K.	
3. Energy saving in wireless transmissions.....	35
Domański A., Domańska J., Klamka J., Czachórski T., Holewa G.	
4. Determining the position based on the strength of the radio signal with the use of the collections convergence.....	47
Socha M., Górka W., Piasecki A.	
5. Indoor position determination based on WiFi signal strength with the use of fuzzy logic	57
Socha M., Górka W., Kotorz I.	

Part II. Computer systems security and quantum cryptography

6. Cryptography on the Base of Cellular Automata.....	71
Ostapov S., Val O., Yanushevsky S., Chyzhevsky D.	
7. Quantum protocols in e-voting	87
Sobota M.	
8. Research on the critical infrastructures risk management	93
Białas A.	
9. Behavioral HCI-based User Authentication.....	109
Kapczyński A., Sroczyński Z.	
10. Information systems architecture designed for social networking and user data security.....	119
Buchwald P., Światała P., Orzechowski K.	

Part III. Computational methods and applications in data analysis

11. Methods of Artificial Intelligence in Information Linguistics	131
Marecki F., Bucki R.	
12. Improving quality of text mining by using ontology for terms selection in the Vector Space Model	143
Gibert M.	
13. Automation of facial animation generation for virtual characters.....	153
Wadas K.	

14. Applying sequential patterns in the course of treatment T1DM patients analysis 167
Deja R.

Part IV. Performance and optimization of computer systems

15. Performance of Web servers in Xen hypervisor environment 179
Flak J., Skrzewski M.
16. About the performance of multi honeypots malware monitoring 189
Skrzewski M., Flak J.
17. Design and coding an integrated Facebook web application 199
Piontek M., Werner A., Bach M.
18. Traffic analysis case study of a large company wide area network links 209
Rostański M., Świtała P., Wilczek P., Dyduch T.

Part V. Business applications of information technology

19. Social media as a way of communication between local government
and citizens – case study of Mikołów 227
Polko P.
20. Cloud Computing – areas of application and benefits 243
Bartczak K.
21. E-business strategy implementation in multi-project environment 255
Łapuńska I., Pisz I.
22. The impact of the development of the IT and telecommunication technologies
on financial markets 269
Bach M., Werner A., Bach M.
23. Tabular Models of Business Process Structures 281
Zaborowski M.
24. Computer systems supporting granting and determination
of installment loans parameters 299
Marecki F., Mączka K.
